Analysis
Indications of bloom near Sarasota, Naples, and off Tampa Bay. Disregard features noted in Tampa Bay and south of Cape Romano.

--Stumpf

Chlorophyll concentration (above) and possible HAB areas shown in red (inset). Cell concentration sampling data from August 29, 2002 shown as red filled circles (medium to high), yellow filled circles (low), unfilled circle (present), and black "X" (not present).

Wind conditions from Venice Pier

Wind speed and direction are averaged over 12 hours from measurements made on NOAA buoys. Length of line indicates speed; angle indicates direction. Red indicates that the wind direction favors upwelling near the coast.

Please note the following restrictions on all SeaWiFS imagery derived from CoastWatch:
1. These data are restricted to civil marine applications only; i.e. federal, state, and local government use/distribution is permitted.
2. Distribution for military, international, or commercial purposes is NOT permitted.
3. There are restrictions on Internet/Web/public posting of these data.
4. Image products may be published in newspapers. Any other publishing arrangements must receive OrbImage approval via the CoastWatch Program.
