Conditions Report

The previously reported harmful bloom has appeared to have ended. The Texas Department of State Health Services (DShS) has re-opened all Bays to shellfishing. There have been reports of localized intensely red blooms along Padre Island. These blooms are caused by an organism called *Noctiluca*, which is not toxic. It is not the usual red tide organism (*Karenia brevis*) and does not cause respiratory irritation.

Analysis

Blooms of *Dinophysis* are rare in the US and we do not have a standard for monitoring with remote sensing. Imagery does not provide a useful reference for the blooms, but may aid in circulation patterns. Indications are that *Dinophysis* has diminished significantly. The strong onshore winds may produce resuspension and discolored water that are normal and not related to harmful algae. Blooms of *Noctiluca* have been too small for detection. -Lopez, Stumpf

Wind Analysis

Moderate to strong onshore winds this week. Today and tomorrow, southeast winds at 10-15 knots increasing to 15-20 knots on Wednesday. Thursday and Friday, southeast winds around 15 knots.

Please note the following restrictions on all SeaWiFS imagery derived from CoastWatch.

1. Data are restricted to civil marine applications only; i.e. federal, state, and local government use/distribution is permitted.
2. Image products may be published in newspapers. Any other publishing arrangements must receive GeoEye approval via the CoastWatch Program.

Satellite chlorophyll image and forecast winds for April 24, 2008 06Z with Cell concentration sampling data from April 14 to 21 shown as red (high), orange (medium), yellow (low b), brown (low a), blue (very low b), purple (very low a), pink (present), and green (not present). For a list of cell count data providers and a key to the cell concentration categories, please see the HABFS bulletin guide: http://www.csc.noaa.gov/crs/habf/habfs_bulletin_guide.pdf

Verified and suspected HAB areas shown in red. Other areas of high chlorophyll concentration shown in yellow (see p. 1 analysis for interpretation).
