Conditions Report

There is currently no indication of a harmful algal bloom at the coast in Texas. No impacts are expected alongshore Texas today through Monday, August 2.

Analysis

There is currently no indication of a harmful algal bloom along the coast of Texas. Imagery is partially obscured by clouds, but there are patches of elevated chlorophyll visible near the coast from Corpus Christi south to Padre Island. Forecast models indicate negligible (<10km) southward transport from Port Aransas along the coast of Texas over the next three days. -Lopez, Derner, Neff

Wind Analysis

Today through Wednesday, southeast winds around 10-20 knots (5-10m/s). Thursday, southeast winds 5 to 10 knots (~3-5 m/s), shifting on Friday to south winds at 5-15 knots (~3-8 m/s).

Please note the following restrictions on all SeaWiFS imagery derived from CoastWatch.

1. Data are restricted to civil marine applications only; i.e. federal, state, and local government use/distribution is permitted.
2. Image products may be published in newspapers. Any other publishing arrangements must receive GeoEye approval via the CoastWatch Program.
