Conditions Report
There is currently no indication of *Karenia brevis* (commonly known as Texas red tide) along the coast of Texas. No respiratory irritation is expected Monday, June 30 through Monday, July 7. Check [http://tidesandcurrents.noaa.gov/hab/beach_conditions.html](http://tidesandcurrents.noaa.gov/hab/beach_conditions.html) for recent, local observations.

Analysis
There is currently no indication of *Karenia brevis* along the coast of Texas. For information on area shellfish restrictions, contact the Texas Department of State Health Services.

MODIS Aqua imagery from 6/28 (shown left) is obscured by clouds from Sabine Pass to the Padre Island National Seashore region, limiting analysis. No elevated chlorophyll is visible along the Texas coast.

Forecast models based on predicted near-surface currents indicate a potential negligible transport (<10 km) north from the Port Aransas region from June 28 to July 3.

Kavanaugh, Davis

Wind conditions from Port Aransas-Coast, TX

Wind speed and direction are averaged over 12 hours from buoy measurements. Length of line indicates speed; angle indicates direction. Red indicates that the wind direction favors upwelling near the coast. Values to the left of the dotted vertical line are measured values; values to the right are forecasts. Wind observation and forecast data provided by NOAA’s National Weather Service (NWS).

Wind Analysis
**Port Aransas**: Southeast winds (15-20 kn, 8-10 m/s) today becoming south winds (15-20 kn) through Tuesday. Southeast to south winds (5-15 kn, 3-8 m/s) Tuesday night through Wednesday night. Northwest winds (5 kn, 3 m/s) Thursday becoming east winds in the afternoon. Southeast to south winds (5-15 kn) Thursday night through Friday night.
Satellite chlorophyll image and forecast winds for July 1, 2014 06Z with points representing cell concentration sampling data from June 20 to 26: red (high), orange (medium), yellow (low b), brown (low a), blue (very low b), purple (very low a), pink (present), and green (not present). Cell count data are provided by Texas Parks and Wildlife Department. For a list of sample providers and a key to the cell concentration categories, please see the HAB-OFS bulletin guide:
http://tidesandcurrents.noaa.gov/hab/habfs_bulletin_guide.pdf

Verified and suspected HAB areas shown in red. Other areas of high chlorophyll concentration shown in yellow (see p. 1 analysis for interpretation).
